PROFESSIONAL SUMMARY

A highly motivated and versatile Software Engineering graduate with a strong foundation in full-stack web and mobile application development alongside an approach to software quality assurance. Proficient in modern programming languages, frameworks, and database management solutions. Adept at managing the entire software development lifecycle from writing clean, scalable code to implementing thorough functional testing, tracking projects via Trello and maintaining robust system operations.

WORK EXPERIENCE

Hatton National Bank (Alternate Channels Department) *Undergraduate Trainee - System Operations & Monitoring* | Dec 2024 - Dec 2025

- Monitored and managed the network-wide Queue Management System (Token System) operations to ensure maximum uptime and operational performance.
- Conducted functional validation checks on system updates to identify technical anomalies and maintain platform stability.

PROJECTS

Educational Management System (Sector Higher Educational Institute) *Role: Developer & Scheduler* | *Technologies: Flutter, React, Firebase (Firestore, Auth), Android Studio*

- Led end-to-end development of a student mobile app and admin management panel for a live industry client. Engineered an AI chatbot, AI-driven performance analytics, and a QR-based attendance tracking system.
- Managed development sprints, feature backlogs, and bug lifecycles using Trello to ensure on-time delivery.
- Executed manual test cases to resolve data sync defects and secure reliable real-time database connectivity.

New City Hardware — Hardware Platform for Administration & Customers *Role: Developer and QA | Technologies: React, Vite, Tailwind CSS, Firebase, JavaScript, Git*

- Built a responsive web app with product browsing, automated emails, and an admin analytics dashboard which tested across multiple browsers for optimal performance.

Simple Vehicle Management System & REST API Platform *Role: Full-Stack Developer | Technologies: React, Node.js, Java, Spring Boot, Postman, NetBeans*

- Developed a full-stack system architecture, establishing a seamless REST API communication pipeline from a React frontend to a Spring Boot backend.
- Utilized **Postman** to run functional API testing, validating endpoints, JSON payloads, and HTTP status codes to achieve 100% core coverage.

CERTIFICATIONS

- Web Development - Web Design for Beginners (HTML, CSS, JavaScript) - University of Moratuwa
- Programming in Python - Python for Beginners - University of Moratuwa
- React Essential Training - LinkedIn
- Prompt Engineering for ChatGPT - Great Learning Academy

SKILLS

- **Programming & Scripting:** Java, Python, JavaScript, C++, C, SQL.
- **Frameworks & Web Tech:** React, Node.js, Spring Boot, Flutter, Vite, Tailwind CSS, HTML, CSS.
- **Databases & Cloud:** MySQL, Firebase (Firestore, Firebase Auth), WAMP.
- **Testing & Project Management:** Manual Testing, Functional Validation, Test Case Writing, Trello, Postman.
- **Tools & IDEs:** GitHub, Git, Visual Studio Code, IntelliJ IDEA, Android Studio, Apache NetBeans, Adobe Dreamweaver

ACADEMIC QUALIFICATIONS

- BSc (Hons) in Software Engineering (2nd Upper Class) | Jan 2025 - Oct 2025
University of Bedfordshire
- Higher National Diploma in IT | Aug 2022 - Dec 2024
SLIIT City Uni
